## Interest Rates for Savings Accounts

Barclays Bank Ireland PLC Interest Rates

This leaflet details the interest rates for and the availability of savings Accounts. The rates are correct as at $\mathbf{3}$ October 2023.
Capitalised words have the same meaning as shown in the Barclays Bank Ireland Terms (the "Terms"). A copy of the Terms can be accessed at privatebank.barclays.com/terms.

Where an interest rate change is being notified on an Account, the future interest rates are also included. Other rates may apply for Accounts that track a reference rate where the reference rate has changed since the date specified within the leaflet.

The accounts referred to in this document are available to clients subject to eligibility. Terms apply. Please speak to your Private Banker for further details.

The interest rate that applies to an Account is determined according to the Account balance on a tiered basis, unless indicated otherwise.

## Type of Interest Rates

Interest rates can either be tracker rates, fixed rates or managed rates.
A tracker rate is a variable rate which moves in line with changes to an external reference rate. The reference rates used for sterling, US dollar and euro Accounts are set out below. Where, due to the level of the relevant reference rate, the tracker rate will be $0 \%$ or lower, we may choose to continue to pay a nominal rate of interest.
A fixed rate is a rate that does not change for a set period of time.
A managed rate is a variable rate that we set and change in accordance with our Terms.

## Reference rates

A reference rate is a rate not set by us and is publicly available so you can check it independently. Below are details of the reference rates used for our sterling, US dollar and euro Accounts.

The sterling reference rate is the Bank of England Base Rate. The Bank of England reference rate is variable. The US dollar reference rate is the Target Federal Funds Rate (Upper Bound). The Target Federal Funds Rate (Upper Bound) is variable.

The euro base rate is the European Central Bank deposit facility rate. The European Central Bank deposit facility rate is variable.

## Definitions

Annual Equivalent Rate (AER) - Illustrates what the interest would be if the interest rate was paid and compounded once each year.

Gross Rate - Is the rate of interest payable without the deduction of tax. We will deduct tax where required to do so by law. You have sole responsibility for the management of your legal and tax affairs, including making any applicable filings and payments, and complying with any applicable laws and regulations.
