Voting Disclosure Report

Introduction

At Barclays Private Bank, we aim to create long term value for our clients and stakeholders while investing responsibly. Identifying and managing environmental, social and governance (ESG) risks and opportunities, which can have a material impact on financial returns, is key to achieving our goal. This means we consider ESG factors throughout our investment process, alongside financial information.

Barclays Private Bank has partnered with a leading stewardship provider, EOS at Federated Hermes (EOS) (collectively referred to as “we”/ “our” in this report), to support us with engagement on our direct fixed income and equity holdings and voting on our direct equity holdings. By working with other like-minded investors to amplify our voice, we believe company engagement becomes more effective, enabling us to deliver better risk adjusted returns for our clients over the long term.

Voting at shareholder meetings and engaging with portfolio companies on ESG issues can be highly effective mechanisms to reduce portfolio risks and maximise potential returns. They also give us the opportunity, on behalf of our clients, to have a positive influence on corporate behaviour and promote more sustainable business practices.

We actively vote on matters put to shareholders, and engage with portfolio companies on material ESG issues, to encourage them to better manage and mitigate ESG risks, and to improve their ESG disclosures.

We will support management where voting proposals are aligned with the interests of our clients. Conversely, if we believe ESG practices are not in our clients’ long term interests, we will signal our concern by voting against them. Although voting normally occurs only once a year, our analysis and dialogue with companies typically takes place on an ongoing basis.

This report gives an overview of the voting activities undertaken on behalf of our clients over the period indicated on the title page of this report.

It is our intention to exercise voting in all markets. However, our ability to do so may be hindered by regulatory and practical considerations, as well as internal restrictions. For example, we may be unable to vote due to restrictions relating to share blocking (markets where proxy voters have their securities blocked from trading during the period of the annual meeting), split voting (the ability to provide different instructions in relation to assets held in the same account) and partial voting (when only a portion of the total shares in an account is voted on).
